CHOOSE THE RIGHT PARTNER

Focus on long-term partnership
that delivers results today and
tomorrow.

Keeping in mind how challenging it is to differentiate your product on supermarket shelves, we create unique solutions that help you stand out at point of sale. Offering a wide range of pack styles, we can recommend a solution that will both appeal to your customers and help you maintain effective production.

In collaboration with our partner Bonals Technologie – a specialist in recipe formulation, maturation, and bouillon compaction – we offer a turnkey solution for a complete production line. Their press is directly connected to our packaging machine, significantly reducing the overall footprint while optimizing production flow.

BENEFITS

- Brand differentiation with a premium pack style
- Short delivery time of spare parts
- Worldwide sales network and extensive after-sales support
- Fast return on investment

SELECT YOUR PERFECT SOLUTION

SOUP CUBES AND TABLETS

WRAPPING MACHINES

Sapal offers two single format machines developed using the company's worldwide knowledge base and expertise: the DBD 500-1 for tablets and the DBD 600-1 for soup cubes.

Both machines have a twin wrapping head, three-side heat seal, designed for the mid-range speed wrapping of soup tablets and cubes. The maximum output of the DBD 500-1 is up to 500 tablets/min and the one of the DBD 600-1 is up to 600 cubes/min.

Different types of wrapping material, such as aluminum, OPP laminates and paper can be used, always ensuring a perfect folding and sealing.

Thanks to an accessible and dismountable folding box layout, as well as the pivoting cover on the heat-sealing channel, these reliable machines are easy to clean and to maintain.

Additionally, the DBD 500-1 has the capability to accept a height range of 9 to 12 mm - which represent a tolerance of 3mm - without having to change the format parts or the printing layout.

BENEFITS

- Robust and reliable design
- Proven ergonomics for easy operation and maintenance
- Perfect folding and sealing, easy to open
- Adjustable product height
- Reduced operating costs
- User-friendly interface
- Automatic synchronization with upstream production and secondary packaging
- Broad compatibility with various packaging materials
- Capable of processing recyclable mono-films – OPP plastic or paper-based

For specific inquiries please ask for additional information or speak directly to a sales representative.

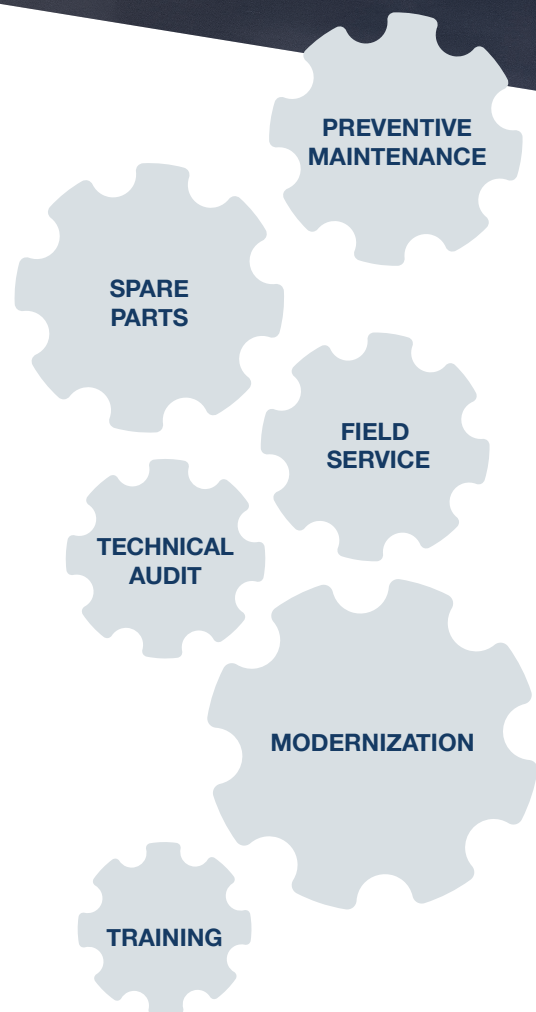

SAFE-PROOF YOUR PRODUCTION

Our comprehensive portfolio of services tailored to your specific needs includes Preventive Maintenance, Modernization, Spare Parts, Field Service, Technical Audit and Training for your employees. Everything has been designed for a single purpose: to assist you in achieving maximum output and minimum downtime for your Sapal and former Kustner packaging machines. Additionally, we can provide a refurbishment service for your used machines. This means we can purchase, refurbish and sell your machines, providing an economic alternative for your investment.
